

# ERMYAS MISIKER

## Full-Stack Software Developer

ermiman197@gmail.com · +251 937 845 575 · Addis Ababa,  
Ethiopia · [ermiyasmisiker.vercel.app](mailto:ermiyasmisiker.vercel.app) · [github.com/ermizamr](https://github.com/ermizamr) · [linkedin.com/in/ermiyas-misiker](https://linkedin.com/in/ermiyas-misiker)

---

## PROFILE

Full-stack developer and founder with experience building production-grade B2B SaaS and multi-role educational platforms. Comfortable across the full stack, from Django/Python and PostgreSQL backends to React and Flutter frontends. Driven by a passion for space technology and Ethiopian tech.

## EXPERIENCE

### Founder & Lead Full-Stack Engineer

Jan 2026 – Present

USDENT — B2B SaaS · Remote (US-focused)

- ▶ Built and launched a B2B SaaS platform automating dental insurance appeal workflows for US dental clinics, reducing manual administrative overhead.
- ▶ Designed the full product architecture: multi-tenant backend (Django/Python + PostgreSQL), React frontend, and REST API layer.
- ▶ Implemented secure clinic onboarding, user role management, and automated appeal letter generation.

### Full-Stack Developer & Maintainer

Jan 2025 – Present

E.mslene Educational Platform · Addis Ababa

- ▶ Architected a multi-role academic management system serving students, teaching staff, and administrators on a shared platform.
- ▶ Built a centralized admin dashboard with granular RBAC — controlling curriculum management, push notifications, and staff permission assignment.
- ▶ Developed dual portals for students and staff supporting digital registration, real-time attendance tracking, grade disclosure, and academic add/drop workflows.
- ▶ Ensured end-to-end data integrity across cross-portal flows from classroom entry to student-facing records.

## PROJECTS

### TG-TEACHER BOT

Mar 2026

Python · Groq/OpenAI API · Supabase · Telegram Bot API

- ▶ AI-powered Telegram bot for space, STEM, and Ethiopian tech learners using prompt engineering and an OpenAI-compatible API (Groq).
- ▶ Features persistent user memory (Supabase), context-aware responses, public portfolio support, and owner-only project diary tools.

### Space For ET

Jan 2026 – Present

Flutter · Dart · REST APIs

- ▶ Educational mobile app highlighting Ethiopia's contributions to space exploration, featuring curated history, news, and location-aware stargazing guidance.
- ▶ Integrates live rocket launch alerts and real-time space science news feeds.

### Space News Bot

Jan 2026 – Present

Python · Telegram Bot API

- ▶ Telegram bot that aggregates and delivers daily space news updates to subscribers automatically.

## EDUCATION

### BSc in Computer Science

Addis Ababa University · Addis Ababa

Sep 2025 – Jul 2029 (Expected)

## TECHNICAL SKILLS

- Python
- JavaScript
- Flutter
- REST APIs
- RBAC / Auth
- Django
- React
- PostgreSQL
- Supabase
- Git & GitHub
