ERMYAS MISIKER

Full-Stack Developer & AI Systems Engineer

Addis Ababa, Ethiopia • +251 937 845 575 • ermizamr197@gmail.com • ermizamr.tech • github.com/ermizamr • linkedin.com/in/ermiyas-misiker

TECHNICAL SKILLS

AI & Speech:	On-Device NMT, ONNX Runtime, C++ FFI, VITS MMS-TTS, Quantized NLLB-200, PyTorch, Gemini 2.5 Flash, Hohe ASR
Languages:	Python, TypeScript, JavaScript, Dart, Kotlin, C++, SQL, HTML5, CSS3
Backend & Cloud:	FastAPI, Django, PostgreSQL, Supabase, Node.js, REST APIs, Multi-Tenancy & RBAC, Docker
Frontend & Mobile:	React, Tailwind CSS, Flutter, Android (Kotlin), Chrome MV3 Extensions

EXPERIENCE

Weg (ወግ) AI
Oct 2026 – Present

Founder & Lead Architect — Addis Ababa, Ethiopia

- Architected a client-side Amharic AI meeting assistant across a **Chrome MV3 Extension** and **Kotlin Android app**, capturing system/tab audio directly without bot participants.
- Engineered real-time 5-second audio chunk streaming and hybrid transcription pipelines combining **Hohe ASR** and **Gemini 2.5 Flash** for structured bilingual note generation.
- Developed high-throughput **Python / FastAPI** backend services for asynchronous processing, transcript caching, and action item synthesis.

LISAN (ልሳን) AI
Feb 2026 – Present

Co-Founder & AI Systems Lead — Addis Ababa, Ethiopia

- Engineered an offline speech-to-speech translation mobile system across 4 Ethiopian languages (Amharic, Afaan Oromoo, Tigrinya, Somali, English) operating within a strict **350MB RAM limit**.
- Implemented zero-copy **C++ FFI** decoding for on-device **VITS MMS-TTS** and 8-bit quantized **NLLB-200** via **ONNX Runtime**, running completely without an internet connection.
- Built the LISAN validation ecosystem and gamified Telegram bot with real-time XP leaderboards, crowdsourcing and verifying over **373K+ bitext pairs**.

USDENT
Jan 2026 – Present

Founder & Lead Full-Stack Engineer — Remote (US Clinics)

- Built a B2B SaaS platform automating dental insurance appeal workflows for US dental clinics, reducing manual administrative processing time by over 70%.
- Architected multi-tenant backend using **Django** and **PostgreSQL** with row-level security, granular RBAC, and automated appeal letter generation with a **React** frontend.

E.mslene Educational Platform
Jan 2025 – Present

Full-Stack Developer & Maintainer — Addis Ababa, Ethiopia

- Architected a multi-role academic management system serving students, faculty, and administrators with role-based dashboards, course enrollment, and grade disclosure workflows.

SELECTED PROJECTS

TG-Teacher Bot — AI STEM & Space Science Tutor
Mar 2026

Python, Groq API, Supabase, Telegram Bot API — t.me/erzamrbot

- Engineered an AI tutor bot with persistent student memory and multi-turn dialogue management via Supabase PostgreSQL, serving space science learners.

Space For ET — Space Exploration Mobile App
Jan 2026 – Present

Flutter, Dart, REST APIs — github.com/ermizamr/SPACE-FOR-ET-APK

- Developed cross-platform mobile application delivering real-time rocket launch notifications, satellite pass schedules, and Ethiopian space science news.

EDUCATION

Addis Ababa University
2022 – 2026

Bachelor of Science in Computer Science — Addis Ababa, Ethiopia
